INTERNATIONAL COURSE ON

COLOPROCTOLOGY

Complex anal fistulas and
Pilonidal Disease.
VAAFT and EPSiT: new minimally
invasive surgical treatments.

MENDRISIO
(Switzerland)

20-21 **september** 2013

Dear Colleague,
in 2011 and 2012, nine training courses were held on the subject of perianal fistulas, and in particular, on the new minimally invasive VAAFT (Video Assisted Anal Fistula Treatment) technique.

Participants came from Italy and from overseas countries. Thus, the technique has spread to numerous other countries and, up to now, there have been numerous tutoring requests.

During the course, we will also discuss about the new EPSiT technique (Endoscopic Pilonidal Sinus Treatment), conceived to treat visually the pilonidal disease in the minimally invasive way.

In the next three years, the aim will be to enrich the scientific content of the courses and extend participation to a greater number of surgeons, given the large number of requests coming from all over the world.

The course will be held in English language.

Each course is organized into lectures followed by live surgery in the operating room.

The expert Italian and Swiss faculty is complemented by one or two of the most prominent surgeons worldwide, with the aim to provide a platform for a stimulating exchange of ideas and experiences.

I'm looking forward to meeting you soon!
